# CINAHL Plus with Full Text Advanced Searching

Tutorial

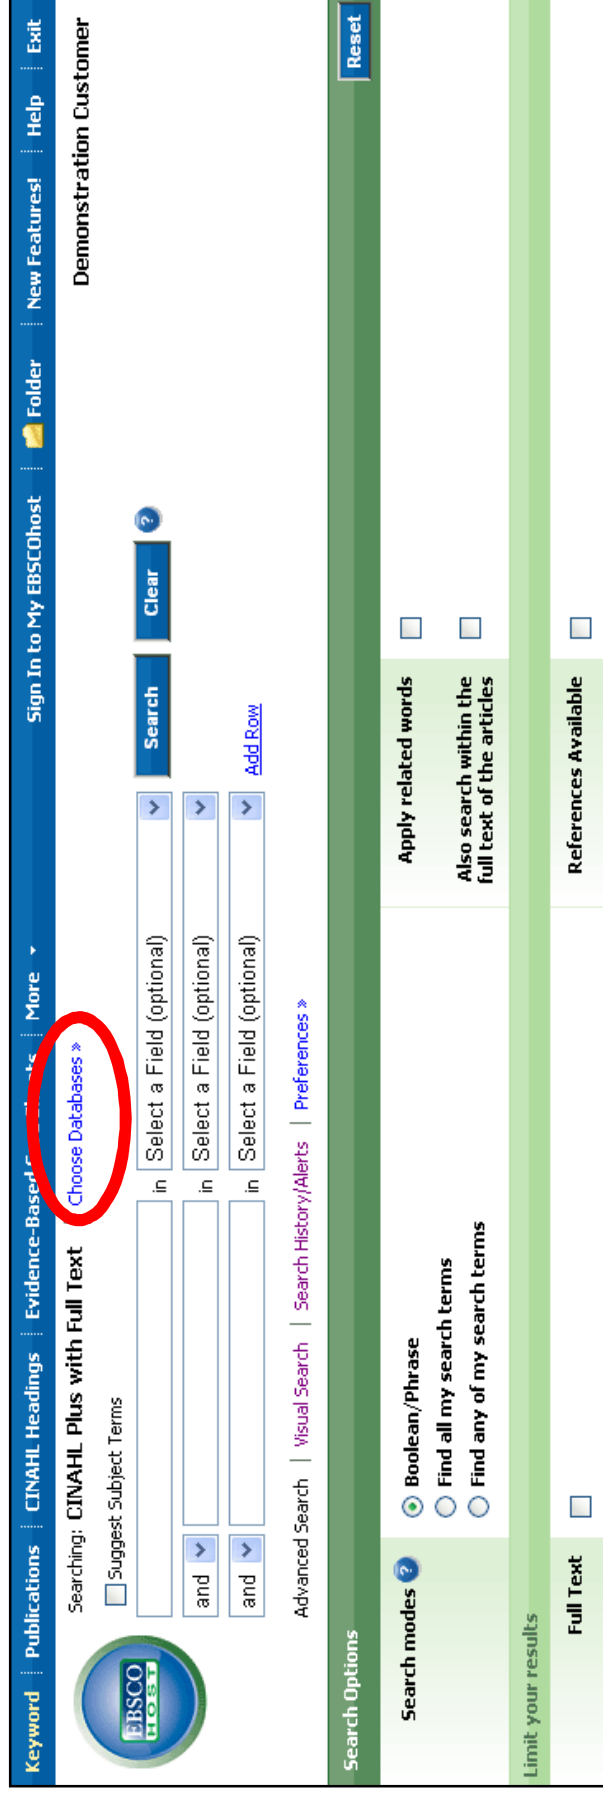

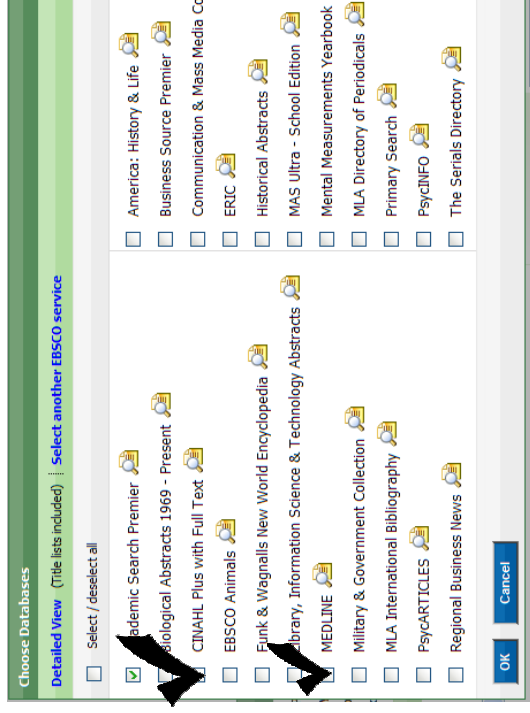

We Are  
Located in  
HS-103

EBSCOhost allows you to select specialized databases to include in your search. You will want to include CINAHL Plus, a major nursing database, as well as Medline.

## Choosing Databases

Click “**Choose Databases**,” and click the box next to CINAHL Plus and Medline, then click OK. Next, click on “**Advanced Search**,” enter your subject terms, select a Field and click Search.

You may want to click on the Full Text box, but this will keep you from locating the full text of articles not available in EBSCOhost but are available in CSUSB’s other databases.

Keyword: Publications | CINAHL Headings | Evidence-Based | More | **Choose Databases >** | Sign In to My EBSCOhost | Folder | New Features! | Help | Exit

Demonstration Customer

For hard to research topics, you may want to click the Full Text box, which will enable EBSCOhost to also search the articles full text to locate articles that discuss your topic. Follow instructions below.

The screenshot displays the EBSCOhost search interface. At the top, there is a navigation bar with links for 'Keyword', 'Publications', 'CINAHL Headings', 'Evidence-Based Care Sheets', 'More', 'Sign In to My EBSCOhost', 'Folder', 'New Features!', 'Help', and 'Exit'. The user is identified as 'Demonstration Customer'. The search area includes a search box with the text 'Searching: CINAHL Plus with Full Text | Choose Databases >'. Below the search box are three dropdown menus for 'in' operators, each with the text 'Select a Field (optional)'. A red circle highlights the 'Search' button. Below the search area are links for 'Advanced Search', 'Visual Search', 'Search History/Alerts', and 'Preferences >'. The 'Search Options' section is divided into two columns. The left column contains 'Search modes' with radio buttons for 'Boolean/Phrase' (selected), 'Find all my search terms', and 'Find any of my search terms'. The right column contains 'Apply related words' and 'Also search within the full text of the articles', both with checkboxes. Below this is the 'Limit your results' section, which includes a red circle around the 'Full Text' checkbox. Other options include 'Abstract Available', 'Published Date from' (with 'Month' and 'Year' dropdowns), 'Peer Reviewed', 'Exclude Pre-CINAHL', and 'CE Module'. The bottom right of the interface has a 'Reset' button.

Begin by conducting a keyword search from the Advanced Search screen. Enter **migraine** in the **Find** field, check the Full Text limiter to restrict results to those including full text only, and then click **Search** to view a Result List of all articles that contain your term in one of the citation fields.

**SUBJECT TERMS:** Searching for subject terms can also be useful. The CINAHL Editorial staff has assigned subject terms based on article content, resulting in broader results when you click the Suggest Subject Terms box above the **Find** field, prior to conducting a search. You can also click on the CINAHL Headings link along the top toolbar to browse for appropriate subject terms.
